1983 Journal of Energy Index

How to Use the Index

In the Subject Index, pages 754-757, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, page 758, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 759-763, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1983, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Theoretical Improvement of Wind Turbine Output by the Addition of Tip Devices **E83-125**
Method for Estimating the Aerodynamic Coefficients of Wind Turbine Blades at High Angles of Attack **E83-124**
The Performance of Biplane Wells Turbine **E83-121**
Performance of Propeller Wind Turbines **E83-104**
Optimization of Darrieus Turbines with an Upwind and Downwind Momentum Model **E83-051**
Transformation of Wind Energy by a High-Altitude Power Plant **E83-015**
On the Rotary Wing Concept for Jet Stream Electricity Generation **E83-014**
Aerodynamic Platform Comparison for Jet-Stream Electricity Generation **E83-003**

Economics

Aerodynamic Platform Comparison for Jet-Stream Electricity Generation **E83-003**

Fuels and Fuel Systems

NASA/General Electric Broad-Specification Fuels Combustion Technology Program: Phase I **E83-084**
Development and Operating Characteristics of an Advanced Two-Stage Combustor **E83-057**

Guidance and Control

Pitch Control System for Large-Scale Wind Turbines **E83-031**

Military Missions

Fuel Character Effects on the TF41 Engine Combustion System **E83-036**

Noise

An Overview of Combustion Noise **E83-077**

Performance

Studies on the Dynamic Characteristics of the Horizontal Shaft Wind Turbine **E83-096**
Approximate Aerodynamic Analysis for Horizontal Axis Wind Turbines **E83-040**

Propeller and Rotor Systems

Theoretical Improvement of Wind Turbine Output by the Addition of Tip Devices **E83-125**
Method for Estimating the Aerodynamic Coefficients of Wind Turbine Blades at High Angles of Attack **E83-124**
Rated Electrical Power Needed in a Wind Turbine for a Home **E83-123**
Studies on the Dynamic Characteristics of the Horizontal Shaft Wind Turbine **E83-096**

Energy

Alternate Fuels

Correlation of Lean Blowoff of Gas Turbine Combustors Using Alternative Fuels **E83-116**
Correlation of Gas Turbine Combustor Efficiency **E83-097**
The Effects of Cycling an Air-Water Interface in St. Peter Sandstone **E83-094**
Operational Experience with Flat-Plate Photovoltaic Systems **E83-054**
Ocean Thermal Energy Conversion: Historical Highlights, Status, and Forecast **E83-049**
Vector Statistics of Hourly Wind Advection Data for Energy Transport Applications **E83-043**
Fuel Character Effects on the TF41 Engine Combustion System **E83-036**
Future U.S. Jet Fuels--A Refiner's Viewpoint **E83-033**
Liquid Fuel Spray Ignition Predictions for JP-10 **E83-016**
Electrocyclone for High-Temperature, High-Pressure Dust Removal **E83-006**

Batteries

A Simulation Approach in Sizing Hybrid Photovoltaic and Wind Systems **E83-126**
An Experimental Model of Bubble Formation in CAES Plants **E83-119**
Configuration Selection Study for Isolated Loads **E83-028**

Biomass

Gaseous Fuel Generation by Magma-Thermal Conversion of Biomass **E83-042**
Characteristics of a Closed Brayton Cycle Piston Engine **E83-026**

Combustion

Correlation of Lean Blowoff of Gas Turbine Combustors Using Alternative Fuels **E83-116**
Coal-Fired CAES System Using Fluidized Bed Combustion **E83-115**
Oxidant System Improvements for MHD Energy Conversion and Industrial Processes **E83-114**
A New Technique for Thermodynamic Engine Modeling **E83-108**
Instantaneous Heating of a Flowing Spray **E83-102**
Correlation of Gas Turbine Combustor Efficiency **E83-097**
NASA/General Electric Broad-Specification Fuels Combustion Technology Program: Phase I **E83-084**
Aspects of Computer Simulation of Liquid-Fueled Combustors **E83-080**
An Overview of Combustion Noise **E83-077**
Combustor Development for Automotive Gas Turbines **E83-070**
Underground Coal Gasification Cavity Growth Model **E83-067**
Temperature and Species-Concentration Measurements in Turbulent Flames by the CARS Technique **E83-066**
Flame Studies with the Coherent Anti-Stokes Raman Spectroscopy Technique **E83-064**
Development and Operating Characteristics of an Advanced Two-Stage Combustor **E83-057**

Underground Coal Gasification Cavity Growth Model **E83-067**
Temperature and Species-Concentration Measurements in Turbulent Flames by the CARS Technique **E83-066**
Flame Studies with the Coherent Anti-Stokes Raman Spectroscopy Technique **E83-064**
Development and Operating Characteristics of an Advanced Two-Stage Combustor **E83-057**

Fuel Character Effects on the TF41 Engine Combustion System E83-036
Sooting Tendency of Fuels Containing Polycyclic Aromatics in a Research Combustor E83-029
Liquid Fuel Spray Ignition Predictions for JP-10 E83-016
Electrocyclone for High-Temperature, High-Pressure Dust Removal E83-006
NO_x Formation Experiments in an MHD Simulation Facility E83-004

Conservation

Analysis of a Liquid/Gas Direct Contact Heat Exchanger Concept E83-117
Finite Element Analysis of Radiative Transport in Fibrous Insulation E83-112
An Experimental Facility for the Investigation of the Two-Dimensional Stefan Problem E83-107
The Effect of Nonuniform Water Distribution on Cooling Tower Performance E83-103
Configuration Selection Study for Isolated Loads E83-028
Transient Analysis of A Natural Circulation Solar Water Heater with a Heat Exchanger E83-020

Cryogenics

Oxidant System Improvements for MHD Energy Conversion and Industrial Processes E83-114
Factors Affecting the Optimization of the Stirling Cycle for Use as a Heat Pump E83-079

Exploration and Recovery

Subsurface Geologic Considerations in Siting an Underground Pumped-Hydro Project E83-091

Geothermal

Condensation Film Coefficients for Mixtures of Isobutane and Isopentane E83-078
Gaseous Fuel Generation by Magma-Thermal Conversion of Biomass E83-042

Hydroelectric Power

In Situ Stress Measurement and Design Guidelines for Compressed Air Energy Storage/Underground Pumped Hydro Excavations E83-092
Subsurface Geologic Considerations in Siting an Underground Pumped-Hydro Project E83-091
Capital Cost of Small-Scale Tidal Power Plants E83-088

Hydrogen and Unique Fuels

Ocean Thermal Energy Conversion: Historical Highlights, Status, and Forecast E83-049

Lasers

A Solar Pumped Gas Laser for the Direct Conversion of Solar Energy E83-082
Temperature and Species-Concentration Measurements in Turbulent Flames by the CARS Technique E83-066
Flame Studies with the Coherent Anti-Stokes Raman Spectroscopy Technique E83-064

Magnetohydrodynamics

Fault Currents in MHD Faraday Generators E83-120
Oxidant System Improvements for MHD Energy Conversion and Industrial Processes E83-114
Effects of Core Nonuniformities on the Performance of MHD Generators E83-109
Transient Flow Analysis of the AEDC/HPDE MHD Generator E83-105
Acoustic and Entropy Waves in a Nonideal Combustion MHD Generator E83-100
Analytical Model of the Electrical Characteristics of Linear MHD Generators E83-098
MHD/Gas Turbine Systems Designed for Low Cooling Water Requirements E83-089
Investigative Data Analysis of Faraday MHD Generator Experiments E83-086
Surface Field Limitation in Diffuse Anodic Discharges E83-085
Simplified Three-Dimensional Modeling for MHD DCW Channels E83-076
Interelectrode Resistance and Performance of Small- and Large-Scale MHD Generators E83-075
Interaction between MHD Generator and dc-ac Power Conversion System E83-069
Secondary Flow Effects in Diagonal MHD Channels E83-063
Mass Balance on the Arc Mode Seed Electrodes E83-062
Simulation of Starting Transients in the UTSI MHD Generator E83-060
Magnetohydrodynamic Generator Scaling Analysis for Baseload Commercial Powerplants E83-055
Three-Dimensional Flow Development in MHD Generators at Part Load E83-047
Electrical Characteristics of an MHD Generator with a Transversally Shaped Configuration of Magnetic Induction E83-045
Arc Damage of Interelectrode Insulators in MHD Generators E83-044
MHD Pseudoshock and Qualitative Model in the Performance of Supersonic Generators E83-035
Measurement of Plasma Conductivity Using Faraday Rotation of Submillimeter Waves E83-030
MHD Channel Performance for Potential Early Commercial MHD Power Plants E83-025
Cross-Sectional Current Distribution in Coal Fired Diagonal Conducting Wall MHD Generator E83-021
Analytical Investigation of Axial Field Limitations in MHD Generators E83-017
Extremal MHD Generator E83-013
Coupled Three-Dimensional Flow and Electrical Calculations for Faraday MHD Generators E83-009
Study of Electrical Faults in Magnetohydrodynamic Faraday Generators E83-008
The STD/MHD Codes: Comparison of Analyses with Experiments E83-007
Inflow Disk Generator for Open-Cycle MHD Power Generation E83-005
NO_x Formation Experiments in an MHD Simulation Facility E83-004
Experimental Investigation of Axial Field Limitations in MHD Generators E83-002

Microwaves

Summary Assessment of the Satellite Power System E83-032

Nuclear Fission

Analytic Redundancy for On-Line Fault Diagnosis in a Nuclear Reactor E83-059
Fault Detection and Isolation in a Nuclear Reactor E83-011

Ocean Thermal

Condensation Film Coefficients for Mixtures of Isobutane and Isopentane E83-078
Ocean Thermal Energy Conversion: Historical Highlights, Status, and Forecast E83-049

Ocean Wave and Tidal

The Performance of Biplane Wells Turbine E83-121
Performance of Small-Scale Tidal Power Plants E83-087
Aerodynamic Performance of a Wells Air Turbine E83-037

Photovoltaic Power

A Simulation Approach in Sizing Hybrid Photovoltaic and Wind Systems E83-126
Limits to Solar Power Conversion Efficiency with Applications to Quantum and Thermal Systems E83-095
Operational Experience with Flat-Plate Photovoltaic Systems E83-054

Power Conditioning

Interaction between MHD Generator and dc-ac Power Conversion System E83-069

Reciprocating Machinery

Factors Affecting the Optimization of the Stirling Cycle for Use as a Heat Pump E83-079
Modeling and Experimental Determination of the Axisymmetric Flow in a Diesel Engine Cylinder E83-071
Equation for Compressible Reciprocating Engine Flows E83-056
Characteristics of a Closed Brayton Cycle Piston Engine E83-026

Rotating Machinery

The Performance of Biplane Wells Turbine E83-121
Performance of Propeller Wind Turbines E83-104
Ferroelectric Power Generation in High-Speed Machinery E83-101
Studies on the Dynamic Characteristics of the Horizontal Shaft Wind Turbine E83-096
Assessment of Market Potential of Compressed Air Energy Storage Systems E83-090
Optimization of Darrieus Turbines with an Upwind and Downwind Momentum Model E83-051
Approximate Aerodynamic Analysis for Horizontal Axis Wind Turbines E83-040
Wind Turbine Speed Control by Automatic Yawing E83-039
Aerodynamic Performance of a Wells Air Turbine E83-037

Solar Power Satellites

Solar Cell Screening Technique E83-122
A Solar Pumped Gas Laser for the Direct Conversion of Solar Energy E83-082
Summary Assessment of the Satellite Power System E83-032

Solar Thermal Power

Optimization of Dish Solar Collectors E83-110
An Experimental Facility for the Investigation of the Two-Dimensional Stefan Problem E83-107
A Numerical Study of Phase Change Energy Transport in Two-Dimensional Rectangular Enclosures E83-106
Limits to Solar Power Conversion Efficiency with Applications to Quantum and Thermal Systems E83-095
Condensation Film Coefficients for Mixtures of Isobutane and Isopentane E83-078
Solar Thermal Technologies: Potential Benefits to U.S. Utilities and Industry E83-058
Economic Feasibility of Retrofit Solar Hot Water Systems E83-053
Dish Concentrators for Solar Thermal Energy E83-050
Configuration Selection Study for Isolated Loads E83-028
A Method of Evaluating and Sizing Solar Cogeneration Systems E83-018

Thermoelectric

Limits to Solar Power Conversion Efficiency with Applications to Quantum and Thermal Systems E83-095
Experimental and Systems Studies of the Alkali Metal Thermoelectric Converter for Aerospace Power E83-072

Wind Power

A Simulation Approach in Sizing Hybrid Photovoltaic and Wind Systems E83-126
Theoretical Improvement of Wind Turbine Output by the Addition of Tip Devices E83-125
Method for Estimating the Aerodynamic Coefficients of Wind Turbine Blades at High Angles of Attack E83-124
Rated Electrical Power Needed in a Wind Turbine for a Home E83-123
Power Coefficient of Tornado-Type Wind Turbines E83-118
Optimum Propeller Wind Turbines E83-111
Performance of Propeller Wind Turbines E83-104
Predicted and Experimental Aerodynamic Forces on the Darrieus Rotor E83-099
An Aeroelastic Analysis of the Darrieus Wind Turbines E83-081
Performance of Tornado-Type Wind Turbines with Radial Inflow Supply E83-074
Aerodynamic Analysis of the Darrieus Rotor Including Secondary Effects E83-068
Optimizing a Tandem Disk Model E83-061
Modular Simulation Model for a Wind Turbine System E83-052
Optimization of Darrieus Turbines with an Upwind and Downwind Momentum Model E83-051
Comparison of NACA 6-Series and 4-Digit Airfoils for Darrieus Wind Turbines E83-048
Performance of an Angular Flange Aeroelastic Wind Energy Converter E83-046
Vector Statistics of Hourly Wind Advection Data for Energy Transport Applications E83-043
Double Multiple Streamtube Model with Recent Improvements E83-041
Approximate Aerodynamic Analysis for Horizontal Axis Wind Turbines E83-040
Wind Turbine Speed Control by Automatic Yawing E83-039
Utility Operating Strategy and Requirements for Wind Power Forecast E83-038
Pitch Control System for Large-Scale Wind Turbines E83-031
Numerical Study of the Performance of Tornado-Type Wind Energy Systems E83-024
Aerodynamic Tests of Darrieus Wind Turbine Blades E83-019
Transformation of Wind Energy by a High-Altitude Power Plant E83-015
On the Rotary Wing Concept for Jet Stream Electricity Generation E83-014
Optimum Performance of Propeller Wind Turbine Blades E83-012
Mathematical Model for the Analysis of Wind-Turbine Wakes E83-010
Aerodynamic Platform Comparison for Jet-Stream Electricity Generation E83-003

Fluid Dynamics

Aeroacoustics

Row Depth Effects on Vortex Shedding and Turbulent Buffeting Formation E83-073

Boundary Layers and Convective Heat Transfer-Turbulent

Secondary Flow Effects in Diagonal MHD Channels E83-063

Boundary-Layer Stability and Transition

Aerodynamic Tests of Darrieus Wind Turbine Blades E83-019

Computational Methods

Aspects of Computer Simulation of Liquid-Fueled Combustors E83-080
Modeling and Experimental Determination of the Axisymmetric Flow in a Diesel Engine Cylinder E83-071
Secondary Flow Effects in Diagonal MHD Channels E83-063
Equation for Compressible Reciprocating Engine Flows E83-056
Numerical Study of the Performance of Tornado-Type Wind Energy Systems E83-024
MHD Channel Electrical Boundary-Layer Theory and Applications E83-022
Extremal MHD Generator E83-013
Coupled Three-Dimensional Flow and Electrical Calculations for Faraday MHD Generators E83-009

Hydrodynamics

Analytical Simulation of the Champagne Effect in CAES Power Plants E83-093

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Row Depth Effects on Vortex Shedding and Turbulent Buffeting Formation E83-073
Mathematical Model for the Analysis of Wind-Turbine Wakes E83-010

Multiphase Flows

Instantaneous Heating of a Flowing Spray E83-102
Analytical Simulation of the Champagne Effect in CAES Power Plants E83-093
Two-Phase Flow in Pipelines: I Steady-State Flow E83-083
Aspects of Computer Simulation of Liquid-Fueled Combustors E83-080
Electrocyclone for High-Temperature, High-Pressure Dust Removal E83-006

Nonsteady Aerodynamics

Transient Flow Analysis of the AEDC/HPDE MHD Generator E83-105
Analytical Simulation of the Champagne Effect in CAES Power Plants E83-093

Nozzle and Channel Flow

Simplified Three-Dimensional Modeling for MHD DCW Channels E83-076
Underground Coal Gasification Cavity Growth Model E83-067
Polarization and Sidewall Effects in a Coal-Fired MHD Channel E83-034
Coupled Three-Dimensional Flow and Electrical Calculations for Faraday MHD Generators E83-009

Plasmadynamics and MHD

Fault Currents in MHD Faraday Generators E83-120
Effects of Core Nonuniformities on the Performance of MHD Generators E83-109
Transient Flow Analysis of the AEDC/HPDE MHD Generator E83-105
Acoustic and Entropy Waves in a Nonideal Combustion MHD Generator E83-100
Analytical Model of the Electrical Characteristics of Linear MHD Generators E83-098
Surface Field Limitation in Diffuse Anodic Discharges E83-085
Simplified Three-Dimensional Modeling for MHD DCW Channels E83-076
Interelectrode Resistance and Performance of Small- and Large-Scale MHD Generators E83-075
Interaction between MHD Generator and dc-ac Power Conversion System E83-069
Power Takeoff Analysis and Comparison with Experiments in a Coal-Fired MHD Generator E83-065
Simulation of Starting Transients in the UTSI MHD Generator E83-060
Magnetohydrodynamic Generator Scaling Analysis for Baseload Commercial Powerplants E83-055
Electrical Characteristics of an MHD Generator with a Transversally Shaped Configuration of Magnetic Induction E83-045
MHD Pseudoshock and Qualitative Model in the Performance of Supersonic Generators E83-035
Polarization and Sidewall Effects in a Coal-Fired MHD Channel E83-034
MHD Channel Performance for Potential Early Commercial MHD Power Plants E83-025
MHD Channel Electrical Boundary-Layer Theory and Applications E83-022
Cross-Sectional Current Distribution in Coal Fired Diagonal Conducting Wall MHD Generator E83-021
Extremal MHD Generator E83-013
Study of Electrical Faults in Magnetohydrodynamic Faraday Generators E83-008
The STD/MHD Codes: Comparison of Analyses with Experiments E83-007
Inflow Disk Generator for Open-Cycle MHD Power Generation E83-005
Thermionically Emitting Copper Cathode in Contact with Combustion Plasmas E83-001

Radiatively Coupled Flows and Heat Transfer

Instantaneous Heating of a Flowing Spray E83-102

Subsonic Flow

Optimizing a Tandem Disk Model E83-061
Comparison of NACA 6-Series and 4-Digit Airfoils for Darrieus Wind Turbines E83-048
Wind Turbine Speed Control by Automatic Yawing E83-039
Aerodynamic Tests of Darrieus Wind Turbine Blades E83-019
Optimum Performance of Propeller Wind Turbine Blades E83-012
Study of Electrical Faults in Magnetohydrodynamic Faraday Generators E83-008

Interdisciplinary Topics

Analytical and Numerical Methods

Factors Affecting the Optimization of the Stirling Cycle for Use as a Heat Pump E83-079
Utility Operating Strategy and Requirements for Wind Power Forecast E83-038
A Method of Evaluating and Sizing Solar Cogeneration Systems E83-018

Atmospheric and Space Sciences

Vector Statistics of Hourly Wind Advection Data for Energy Transport Applications E83-043

Computer Communications, Information Processing and Software

Analytic Redundancy for On-Line Fault Diagnosis in a Nuclear Reactor E83-059
Fault Detection and Isolation in a Nuclear Reactor E83-011

Computer Software

A Numerical Study of Phase Change Energy Transport in Two-Dimensional Rectangular Enclosures E83-106
Modular Simulation Model for a Wind Turbine System E83-052
The STD/MHD Codes: Comparison of Analyses with Experiments E83-007

Lasers and Laser Applications

Temperature and Species-Concentration Measurements in Turbulent Flames by the CARS Technique E83-066
Flame Studies with the Coherent Anti-Stokes Raman Spectroscopy Technique E83-064
Summary Assessment of the Satellite Power System E83-032

Numerical Analysis

A Numerical Study of Phase Change Energy Transport in Two-Dimensional Rectangular Enclosures E83-106
Two-Phase Flow in Pipelines: I Steady-State Flow E83-083

Research Facilities and Instrumentation

In Situ Stress Measurement and Design Guidelines for Compressed Air Energy Storage/Underground Pumped Hydro Excavations E83-092

Sensor Systems

Analytic Redundancy for On-Line Fault Diagnosis in a Nuclear Reactor E83-059
Fault Detection and Isolation in a Nuclear Reactor E83-011

Marine Technology

Propulsion

Stored Chemical Energy Propulsion System for Underwater Applications E83-023

Propulsion

Airbreathing Propulsion

Analysis of the Effect of Oxygen Addition on Minimum Ignition Energy E83-113

Combustion and Combustor Designs

Correlation of Lean Blowoff of Gas Turbine Combustors Using Alternative Fuels E83-116
Analysis of the Effect of Oxygen Addition on Minimum Ignition Energy E83-113
Correlation of Gas Turbine Combustor Efficiency E83-097
An Overview of Combustion Noise E83-077
Modeling and Experimental Determination of the Axisymmetric Flow in a Diesel Engine Cylinder E83-071
Combustor Development for Automotive Gas Turbines E83-070
Development and Operating Characteristics of an Advanced Two-Stage Combustor E83-057

Combustion Stability, Ignition, and Detonation

Analysis of the Effect of Oxygen Addition on Minimum Ignition Energy E83-113
Liquid Fuel Spray Ignition Predictions for JP-10 E83-016

Electric and Advanced Space Propulsion

Solar Cell Screening Technique E83-122

Engine Performance

A New Technique for Thermodynamic Engine Modeling E83-108
Future U.S. Jet Fuels--A Refiner's Viewpoint E83-033
Characteristics of a Closed Brayton Cycle Piston Engine E83-026

Fuels and Propellants, Properties of

Future U.S. Jet Fuels--A Refiner's Viewpoint E83-033
Sooting Tendency of Fuels Containing Polycyclic Aromatics in a Research Combustor E83-029

Propulsion for Marine Application

Stored Chemical Energy Propulsion System for Underwater Applications E83-023

Support Systems

Stored Chemical Energy Propulsion System for Underwater Applications E83-023

Spacecraft Technology

Electric Power

Solar Cell Screening Technique E83-122
Experimental and Systems Studies of the Alkali Metal Thermoelectric Converter for Aerospace Power E83-072

Structural Mechanics and Materials

Aeroelasticity and Hydroelasticity

An Aeroelastic Analysis of the Darrieus Wind Turbines E83-081
Performance of an Angular Flange Aeroelastic Wind Energy Converter E83-046

Materials, Properties of

The Effects of Cycling an Air-Water Interface in St. Peter Sandstone E83-094

Structural Dynamics

Pitch Control System for Large-Scale Wind Turbines E83-031

Thermophysics and Thermochemistry

Experimental Methods of Diagnostics

Measurement of Plasma Conductivity Using Faraday Rotation of Submillimeter Waves E83-030

Heat Conduction

Evacuated, Load-Bearing Powder Insulation for High Temperature Applications E83-027
Transient Analysis of A Natural Circulation Solar Water Heater with a Heat Exchanger E83-020

Radiation and Radiative Heat Transfer

Finite Element Analysis of Radiative Transport in Fibrous Insulation E83-112
Sooting Tendency of Fuels Containing Polycyclic Aromatics in a Research Combustor E83-029

Thermal Modeling and Analysis

Analysis of a Liquid/Gas Direct Contact Heat Exchanger Concept E83-117
A New Technique for Thermodynamic Engine Modeling E83-108
Underground Coal Gasification Cavity Growth Model E83-067
Transient Analysis of A Natural Circulation Solar Water Heater with a Heat Exchanger E83-020

Thermal Surface Properties

Finite Element Analysis of Radiative Transport in Fibrous Insulation E83-112

Chronological Index

E83-001 Thermionically Emitting Copper Cathode in Contact with Combustion Plasmas. G. V. R. Raju, R. P. Dahiya and Bhumesh Gupta, *Indian Institute of Technology* (JE 7, 1, p. 3) Article

E83-002 Experimental Investigation of Axial Field Limitations in MHD Generators. William Unkel, Charles H. Kruger and J. Kent Koester, *Stanford University* (JE 7, 1, p. 10) Article

E83-003 Aerodynamic Platform Comparison for Jet-Stream Electricity Generation. C. A. J. Fletcher, A. J. Honan and J. S. Sapuppo, *University of Sydney (Australia)* (JE 7, 1, p. 17) Article

E83-004 NO_x Formation Experiments in an MHD Simulation Facility. A. G. Wehr and R. Tang, *Mississippi State University* (JE 7, 1, p. 24) Article based on AIAA Paper 81-0101

E83-005 Inflow Disk Generator for Open-Cycle MHD Power Generation. T. Nakamura, W. E. Lear and R. H. Eustis, *Stanford University* (JE 7, 1, p. 29) Article based on AIAA Paper 81-0250

E83-006 Electrocyclone for High-Temperature, High-Pressure Dust Removal. R. R. Boericke, W. G. Giles, P. W. Dietz, G. A. Kallio and J. T. Kuo, *General Electric Company* (JE 7, 1, p. 43) Article based on AIAA Paper 81-0393

E83-007 The STD/MHD Codes: Comparison of Analyses with Experiments. A. A. Vetter, C. D. Maxwell and S. T. Demetriades, *STD Research Corporation* (JE 7, 1, p. 50) Article based on AIAA Paper 80-0024

E83-008 Study of Electrical Faults in Magnetohydrodynamic Faraday Generators. S. Kuo and E. Levi, *Polytechnic Institute of New York* (JE 7, 1, p. 57) Article

E83-009 Coupled Three-Dimensional Flow and Electrical Calculations for Faraday MHD Generators. S. P. Vanka and R. K. Ahluwalia, *Argonne National Laboratory* (JE 7, 1, p. 65) Article based on AIAA Paper 81-1230

E83-010 Mathematical Model for the Analysis of Wind-Turbine Wakes. Mei-Kao Liu, Mark A. Yocke and Thomas C. Myers, *Systems Applications, Inc.* (JE 7, 1, p. 73) Article

E83-011 Fault Detection and Isolation in a Nuclear Reactor. Asok Ray, Mukund Desai and John Deyst, *The Charles Stark Draper Laboratory, Inc.* (JE 7, 1, p. 79) Article

E83-012 Optimum Performance of Propeller Wind Turbine Blades. Andrzej Wortman, *AWD Inc.* (JE 7, 1, p. 86) Technical Note

E83-013 Extremal MHD Generator. V. Thiagarajan, *Ebasco Services, Inc.* (JE 7, 1, p. 88) Technical Note

E83-014 On the Rotary Wing Concept for Jet Stream Electricity Generation. Clive A. J. Fletcher, *University of Sydney (Australia)* (JE 7, 1, p. 90) Article

E83-015 Transformation of Wind Energy by a High-Altitude Power Plant. G. Riegler, W. Riedler and E. Horvath, *Research Center Graz* (JE 7, 1, p. 92) Technical Note based on AIAA Paper 81-2568

E83-016 Liquid Fuel Spray Ignition Predictions for JP-10. J. E. Peters and A. M. Mellor, *Purdue University* (JE 7, 1, p. 95) Technical Note

E83-017 Analytical Investigation of Axial Field Limitations in MHD Generators. William Unkel and Charles H. Kruger, *Stanford University* (JE 7, 2, p. 97) Synoptic

E83-018 A Method of Evaluating and Sizing Solar Cogeneration Systems. Joe T. Ator, *The Aerospace Corporation* (JE 7, 2, p. 99) Synoptic based on AIAA Paper 81-2551

E83-019 Aerodynamic Tests of Darrieus Wind Turbine Blades. P. G. Migliore, *University of California*; W. P. Wolfe, *Sandia Laboratories*; and R. E. Walters, *West Virginia University* (JE 7, 2, p. 101) Article based on AIAA Paper 80-0625 CP803

E83-020 Transient Analysis of A Natural Circulation Solar Water Heater with a Heat Exchanger. M. S. Sodha, S. N. Shukla and G. N. Tiwari, *Indian Institute of Technology* (JE 7, 2, p. 107) Article

E83-021 Cross-Sectional Current Distribution in Coal Fired Diagonal Conducting Wall MHD Generator. A. R. Kumaran, B. L. Liu and Y. C. L. Wu, *The University of Tennessee Space Institute* (JE 7, 2, p. 112) Article based on AIAA Paper 81-1228

E83-022 MHD Channel Electrical Boundary-Layer Theory and Applications. S. A. Zwick, E. D. Doss, Y. C. Pan and S. E. Shamma, *Argonne National Laboratory* (JE 7, 2, p. 118) Article based on AIAA Paper 81-1232

E83-023 Stored Chemical Energy Propulsion System for Underwater Applications. T. G. Hughes, R. B. Smith and D. H. Kiely, *The Pennsylvania State University* (JE 7, 2, p. 128) Article based on AIAA Paper 81-1601

E83-024 Numerical Study of the Performance of Tornado-Type Wind Energy Systems. S. S. Ayad, *Faculty of Engineering at Shoubra (Egypt)* (JE 7, 2, p. 134) Article

E83-025 MHD Channel Performance for Potential Early Commercial MHD Power Plants. Daniel W. Swallom, *Avco Everett Research Laboratory, Inc.* (JE 7, 2, p. 141) Article

E83-026 Characteristics of a Closed Brayton Cycle Piston Engine. Richard J. Rosa, *Montana State University* (JE 7, 2, p. 147) Article

E83-027 Evacuated, Load-Bearing Powder Insulation for High Temperature Applications. H. Reiss, *Brown, Boveri & Cie AG (FRG)* (JE 7, 2, p. 152) Article based on AIAA Paper 81-1107

E83-028 Configuration Selection Study for Isolated Loads. W. Revere, J. Bowyer, T. Fujita and H. Awaya, *Jet Propulsion Laboratory, California Institute of Technology* (AIAAJ 7, 2, p. 160) Engineering Note based on AIAA Paper 81-2549

E83-029 Sooting Tendency of Fuels Containing Polycyclic Aromatics in a Research Combustor. D. W. Naegeli, L. G. Dodge and C. A. Moses, *Southwest Research Institute* (JE 7, 2, p. 168) Article based on AIAA Paper 82-0299

E83-030 Measurement of Plasma Conductivity Using Faraday Rotation of Submillimeter Waves. P. J. Kuzmenko and S. A. Self, *Stanford University* (JE 7, 2, p. 176) Article based on AIAA Paper 82-0376

E83-031 Pitch Control System for Large-Scale Wind Turbines. Brad S. Liebst, *University of Minnesota* (JE 7, 2, p. 182) Article

E83-032 Summary Assessment of the Satellite Power System. Francis C. Schwenk, *National Aeronautics and Space Administration* (JE 7, 3, p. 193) Article based on AIAA Paper 80-9267

E83-033 Future U.S. Jet Fuels--A Refiner's Viewpoint. K. H. Strauss, *Texaco Inc.* (JE 7, 3, p. 200) Article based on AIAA Paper 81-0770

E83-034 Polarization and Sidewall Effects in a Coal-Fired MHD Channel. Motoo, Ishikawa, M.H. Scott and Y.C.L. Wu, *The University of Tennessee Space Institute* (JE 7, 3, p. 204) Article based on AIAA Paper 81-1229

E83-035 MHD Pseudoshock and Qualitative Model in the Performance of Supersonic Generators. Pau-Chang Lu, *University of Nebraska*; and Kuei-Hao Wang, *University of Nebraska-Lincoln* (JE 7, 3, p. 211) Article based on AIAA Paper 81-1276

E83-036 Fuel Character Effects on the TF41 Engine Combustion System. R. E. Vogel and D. L. Troth, *General Motors Corporation* (JE 7, 3, p. 218) Article based on AIAA Paper 81-1391

E83-037 Aerodynamic Performance of a Wells Air Turbine. S. Raghunathan and C. P. Tan, *The Queen's University (Northern Ireland)* (JE 7, 3, p. 226) Article

E83-038 Utility Operating Strategy and Requirements for Wind Power Forecast. W. Dub and H. Paper, *University of Regensburg (FRG)* (JE 7, 3, p. 231) Article based on AIAA Paper 81-2539

E83-039 Wind Turbine Speed Control by Automatic Yawing. Kurt H. Hohenemser and Andrew H. P. Swift, *Washington University* (JE 7, 3, p. 237) Article based on AIAA Paper 81-2570

E83-040 Approximate Aerodynamic Analysis for Horizontal Axis Wind Turbines. E. Williams Beans, *University of Toledo* (JE 7, 3, p. 243) Article

E83-041 Double Multiple Streamtube Model with Recent Improvements. Ion Paraschivoiu, *Institut de recherche d'Hydro-Quebec (IREQ)*; and Francois Delclaux, *Laval University (Canada)* (JE 7, 3, p. 250) Article

E83-042 Gaseous Fuel Generation by Magma-Thermal Conversion of Biomass. T. M. Gerlach and H. C. Hardee, *Sandia National Laboratories* (JE 7, 3, p. 256) Article

E83-043 Vector Statistics of Hourly Wind Advection Data for Energy Transport Applications. S. Eskinazi, *Syracuse University*; Hong-zhi Gao, *University of Science and Technology (China)*; and Mukund Borle, *Syracuse University* (JE 7, 3, p. 264) Article

E83-044 Arc Damage of Interelectrode Insulators in MHD Generators. W. Unkel and L. D. Blackman, *Massachusetts Institute of Technology* (JE 7, 3, p. 272) Article

E83-045 Electrical Characteristics of an MHD Generator with a Transversally Shaped Configuration of Magnetic Induction. Naoyuki Kayukawa, *Hokkaido University (Japan)*; Yoshiaki Aoki, *Aokkaido University (Japan)*; Yasutono Ozawa, *Hokkaido University (Japan)*; Masaharu Yoshida and Juro Umoto, *Kyoto University (Japan)* (JE 7, 3, p. 280) Article

E83-046 Performance of an Angular Flange Aeroelastic Wind Energy Converter. Goodarz Ahmadi, *Clarkson College of Technology* (JE 7, 3, p. 285) Technical Note

E83-047 Three-Dimensional Flow Development in MHD Generators at Part Load. Ezzat D. Doss and R. K. Ahluwalia, *Argonne National Laboratory* (JE 7, 4, p. 289) Article based on AIAA Paper 82-0324

E83-048 Comparison of NACA 6-Series and 4-Digit Airfoils for Darrieus Wind Turbines. P. G. Migliore, *University of California* (JE 7, 4, p. 291) Article

E83-049 Ocean Thermal Energy Conversion: Historical Highlights, Status, and Forecast. G. L. Dugger, D. Richards, E. J. Francis and W. H. Avery, *The Johns Hopkins University* (JE 7, 4, p. 293) Survey

E83-050 Dish Concentrators for Solar Thermal Energy. Leonard D. Jaffe, *Jet Propulsion Laboratory, California Institute of Technology* (JE 7, 4, p. 304) Article based on AIAA Paper 81-2530

E83-051 Optimization of Darrieus Turbines with an Upwind and Downwind Momentum Model. John L. Loth and Hugh McCoy, *West Virginia University* (JE 7, 4, p. 313) Article based on AIAA Paper 81-2579

E83-052 Modular Simulation Model for a Wind Turbine System. S. Bergman, *Sydkraft AB (Sweden)*; S. E. Mattsson and A. B. Ostberg, *Lund Institute of Technology (Sweden)* (JE 7, 4, p. 319) Article based on AIAA Paper 81-2558

E83-053 Economic Feasibility of Retrofit Solar Hot Water Systems. Robert R. Somers III and Michael R. Sexton, *University of Virginia*; Alan C. Pritchard, *Duke Power Company*; Marcia C. Hoffman, *Syska and Hennessy, Inc.*; and Leroy S. Fletcher, *Texas A&M University* (JE 7, 4, p. 325) Article

E83-054 Operational Experience with Flat-Plate Photovoltaic Systems. V. Vernon Risser, Paul Hutchinson and Steve Durand, *New Mexico Solar Energy Institute* (JE 7, 4, p. 332) Article based on AIAA Paper 82-0064

E83-055 Magnetohydrodynamic Generator Scaling Analysis for Baseload Commercial Powerplants. D. W. Swallom and C. C. P. Pian, *Avco Everett Research Laboratory* (JE 7, 4, p. 338) Article based on AIAA Paper 82-0394

E83-056 k-ϵ Equation for Compressible Reciprocating Engine Flows. Sherif H. El Tahry, *General Motors Research Laboratories* (JE 7, 4, p. 345) Article

E83-057 Development and Operating Characteristics of an Advanced Two-Stage Combustor. W. Greene and S. Tanrikut, *United Technologies Corporation*; and D. E. Sokolowski, *NASA Lewis Research Center* (JE 7, 4, p. 354) Article based on AIAA Paper 82-0191

E83-058 Solar Thermal Technologies: Potential Benefits to U.S. Utilities and Industry. K. L. Terasawa and W. R. Gates, *Jet Propulsion Laboratory, California Institute of Technology* (JE 7, 4, p. 361) Article

E83-059 Analytic Redundancy for On-Line Fault Diagnosis in a Nuclear Reactor. Asok Ray, Robert Geiger, Mukund Desai and John Deyst, *The Charles Stark Draper Laboratory, Inc.* (JE 7, 4, p. 367) Article

E83-060 Simulation of Starting Transients in the UTSI MHD Generator. Y. F. Liao, M. Ishikawa, H. J. Schmidt and Y. C. L. Wu, *The University of Tennessee Space Institute* (JE 7, 4, p. 374) Article based on AIAA Paper 82-0920

E83-061 Optimizing a Tandem Disk Model. J. V. Healey, *The Queen's University of Belfast* (JE 7, 4, p. 382) Technical Note

E83-062 Mass Balance on the Arc Mode Seed Electrodes. Sadayoshi Korenaga, Hiroyuki Imai and Toshihisa Mashuda, *Electrotechnical Laboratory (Japan)* (JE 7, 5, p. 385) Synoptic

E83-063 Secondary Flow Effects in Diagonal MHD Channels. R. K. Ahluwalia and S. P. Vanka, *Argonne National Laboratory* (JE 7, 5, p. 387) Synoptic

E83-064 Flame Studies with the Coherent Anti-Stokes Raman Spectroscopy Technique. L. P. Goss and G. L. Switzer, *Systems Research Laboratories, Inc.*; and P. W. Schreiber, *Air Force Wright Aeronautical Laboratories* (JE 7, 5, p. 389) Article based on AIAA Paper 80-1543

E83-065 Power Takeoff Analysis and Comparison with Experiments in a Coal-Fired MHD Generator. Motoo Ishikawa, Y. C. L. Wu and M. H. Scott, *University of Tennessee Space Institute* (JE 7, 5, p. 396) Article

E83-066 Temperature and Species-Concentration Measurements in Turbulent Flames by the CARS Technique. L. P. Goss, G. L. Switzer and D. D. Trump, *Systems Research Laboratories, Inc.*; and P. W. Schreiber, *Air Force Wright Aeronautical Laboratories* (JE 7, 5, p. 403) Article based on AIAA Paper 82-0240

E83-067 Underground Coal Gasification Cavity Growth Model. G. J. Harloff, *Gulf Research & Development Company* (JE 7, 5, p. 410) Article

E83-068 Aerodynamic Analysis of the Darrieus Rotor Including Secondary Effects. I. Paraschivoiu, *IREQ, (Canada)*; F. Delclaux, *Laval University (Canada)*; P. Fraunie, *University of Quebec*; and C. Beguier, *IMST (France)* (JE 7, 5, p. 416) Article

E83-069 Interaction between MHD Generator and dc-ac Power Conversion System. Daijiro Tanaka, *Niihama Technical College (Japan)* (JE 7, 5, p. 423) Article based on AIAA Paper 82-0923

E83-070 Combustor Development for Automotive Gas Turbines. Phillip T. Ross and John R. Williams, *General Motors Corporation*; and David N. Anderson, *NASA Lewis Research Center* (JE 7, 5, p. 429) Article based on AIAA Paper 82-1208

E83-071 Modeling and Experimental Determination of the Axisymmetric Flow in a Diesel Engine Cylinder. Nak Won Sung, *Korea Institute of Machinery and Metals*; and Donald J. Patterson, *The University of Michigan* (JE 7, 5, p. 436) Article

E83-072 Experimental and Systems Studies of the Alkali Metal Thermoelectric Converter for Aerospace Power. C. P. Bankston, T. Cole, R. Jones and R. Ewell, *Jet Propulsion Laboratory, California Institute of Technology* (JE 7, 5, p. 442) Article based on AIAA Paper 82-0862

E83-073 Row Depth Effects on Vortex Shedding and Turbulent Buffeting Formation. B. H. Nagamatsu and B. Rolsma, *General Electric Company* (JE 7, 6, p. 450) Synoptic based on AIAA Paper 82-0982

E83-074 Performance of Tornado-Type Wind Turbines with Radial Inflow Supply. C. T. Hsu and H. Ide, *Iowa State University* (JE 7, 6, p. 452) Synoptic

E83-075 Interelectrode Resistance and Performance of Small- and Large-Scale MHD Generators. Ezzat D. Doss and Basil F. Picologlou, *Argonne National Laboratory* (JE 7, 6, p. 454) Synoptic

E83-076 Simplified Three-Dimensional Modeling for MHD DCW Channels. B. L. Liu, J. T. Lineberry and H. J. Schmidt, *University of Tennessee Space Institute* (JE 7, 6, p. 456) Synoptic based on AIAA Paper 83-0464

E83-077 An Overview of Combustion Noise. Abbott Putnam and Lynn Faulkner, *Battelle's Columbus Laboratories* (JE 7, 6, p. 458) Survey Paper based on AIAA Paper 82-0927

E83-078 Condensation Film Coefficients for Mixtures of Isobutane and Isopentane. B. W. Tleimat, G. V. Dizon, S. Zhao, H. Rie and A. D. K. Laird, *Water Thermal and Chemical Technology Center, University of California* (JE 7, 6, p. 470) Article

E83-079 Factors Affecting the Optimization of the Stirling Cycle for Use as a Heat Pump. Robert P. Scaringe, *Florida Institute of Technology* (JE 7, 6, p. 476) Article based on AIAA Paper 80-9366

E83-080 Aspects of Computer Simulation of Liquid-Fueled Combustors. A. D. Gosman and E. Ioannides, *Imperial College (England)* (JE 7, 6, p. 482) Article based on AIAA Paper 81-0323

E83-081 An Aeroelastic Analysis of the Darrieus Wind Turbines. Edward E. Meyer, *Boeing Commercial Airplane Company*; and Charles E. Smith, *Oregon State University* (JE 7, 6, p. 491) Article based on AIAA Paper 81-2572

E83-082 A Solar Pumped Gas Laser for the Direct Conversion of Solar Energy. Willard R. Weaver, *NASA Langley Research Center*; and Ja H. Lee, *Vanderbilt University* (JE 7, 6, p. 498) Article based on AIAA Paper 81-9050

E83-083 Two-Phase Flow in Pipelines: I Steady-State Flow. Jerry L. Modisette, *Modisette, Inc.* (JE 7, 6, p. 502) Article

E83-084 NASA/General Electric Broad-Specification Fuels Combustion Technology Program: Phase I. W. J. Dodds, E. E. Ekstedt and D. W. Bahr, *General Electric Aircraft Engine Business Group*; and J. S. Fear, *NASA Lewis Research Center* (JE 7, 6, p. 508) Article based on AIAA Paper 82-1089

E83-085 Surface Field Limitation in Diffuse Anodic Discharges. W. K. Cheng and M. Martinez-Sanchez, *Massachusetts Institute of Technology*; and D. Dvore, *Aerodyne Research Inc.* (JE 7, 6, p. 518) Article

E83-086 Investigative Data Analysis of Faraday MHD Generator Experiments. W. Unkel, D. W. Swallom and A. W. McClaine, *Avco-Everett Research Laboratory* (JE 7, 6, p. 523) Article

E83-087 Performance of Small-Scale Tidal Power Plants. James A. Fay and Mark A. Smachlo, *Massachusetts Institute of Technology* (JE 7, 6, p. 529) Article

E83-088 Capital Cost of Small-Scale Tidal Power Plants. James A. Fay and Mark A. Smachlo, *Massachusetts Institute of Technology* (JE 7, 6, p. 536) Article

E83-089 MHD/Gas Turbine Systems Designed for Low Cooling Water Requirements. K. D. Annen, *Aerodyne Research Inc.*; and R. H. Eustis, *Stanford University* (JE 7, 6, p. 542) Article

E83-090 Assessment of Market Potential of Compressed Air Energy Storage Systems. D. W. Boyd, O. E. Buckley and C. E. Clark Jr., *Decision Focus Incorporated* (JE 7, 6, p. 549) Article based on AIAA Paper 82-1635 CP826

E83-091 Subsurface Geologic Considerations in Siting an Underground Pumped-Hydro Project. M. S. Coates, *Harza Engineering Company* (JE 7, 6, p. 557) Article based on AIAA Paper 82-1652 CP826

E83-092 In Situ Stress Measurement and Design Guidelines for Compressed Air Energy Storage/Underground Pumped Hydro Excavations. J. E. O'Rourke and R. E. Smith, *Woodward-Clyde Consultants* (JE 7, 6, p. 564) Article based on AIAA Paper 82-1658 CP826

E83-093 Analytical Simulation of the Champagne Effect in CAES Power Plants. A. J. Giramonti and E. B. Smith, *United Technologies Research Center* (JE 7, 6, p. 570) Article based on AIAA Paper 82-1677 CP826

E83-094 The Effects of Cycling an Air-Water Interface in St. Peter Sandstone. Alberto Pujol-Rius, *International Engineering Company, Inc.*; and Howard J. Pincus, *The University of Wisconsin-Milwaukee* (JE 7, 6, p. 575) Article based on AIAA Paper 82-1686 CP826

E83-095 Limits to Solar Power Conversion Efficiency with Applications to Quantum and Thermal Systems. Charles E. Byvik, *NASA Langley Research Center*; A. Martin Buoncristiani and Barry T. Smith, *Christopher Newport College* (JE 7, 6, p. 581) Article

E83-096 Studies on the Dynamic Characteristics of the Horizontal Shaft Wind Turbine. Yukimaru Shimizu and Shunsuke Nakamura, *Mie University (Japan)*; and Kaoru Katayama, *Mitsubishi Automobile Co., Ltd.* (JE 7, 6, p. 589) Article

E83-097 Correlation of Gas Turbine Combustor Efficiency. P. A. Leonard and A. M. Mellor, *Purdue University* (JE 7, 6, p. 596) Article

E83-098 Analytical Model of the Electrical Characteristics of Linear MHD Generators. S. W. Simpson, *University of Sydney* (JE 7, 6, p. 603) Article

E83-099 Predicted and Experimental Aerodynamic Forces on the Darrieus Rotor. Ion Paraschivoiu, *Institut de Recherche d'Hydro-Quebec* (JE 7, 6, p. 610) Article

E83-100 Acoustic and Entropy Waves in a Nonideal Combustion MHD Generator. T. D. Simons, R. H. Eustis and M. Mitchner, *Stanford University* (JE 7, 6, p. 616) Article

E83-101 Ferroelectric Power Generation in High-Speed Machinery. J. V. Hogan, *University of British Columbia* (JE 7, 6, p. 625) Article

E83-102 Instantaneous Heating of a Flowing Spray. I. S. Habib, *The University of Michigan* (JE 7, 6, p. 631) Article based on AIAA Paper 82-0916

E83-103 The Effect of Nonuniform Water Distribution on Cooling Tower Performance. S. C. Kranc, *University of South Florida* (JE 7, 6, p. 636) Article

E83-104 Performance of Propeller Wind Turbines. Andrzej Wortman, *California State University of Fullerton* (JE 7, 6, p. 640) Article

E83-105 Transient Flow Analysis of the AEDC/HPDE MHD Generator. D. R. Wilson and Y. M. Lee, *The University of Texas at Arlington*; and C. S. Stewart, *General Dynamics* (JE 7, 6, p. 644) Article based on AIAA Paper 83-0395

E83-106 A Numerical Study of Phase Change Energy Transport in Two-Dimensional Rectangular Enclosures. G. E. Schneider, *University of Waterloo* (JE 7, 6, p. 652) Article based on AIAA Paper 83-0321

E83-107 An Experimental Facility for the Investigation of the Two-Dimensional Stefan Problem. G. E. Schneider and M. Kaptein, *University of Waterloo* (JE 7, 6, p. 660) Article based on AIAA Paper 83-0322

E83-108 A New Technique for Thermodynamic Engine Modeling. Ronald D. Matthews, Stephen A. Beckel and Miao Shizhi, *University of Texas at Austin*; and James E. Peters, *University of Illinois at Urbana-Champaign* (JE 7, 6, p. 667) Article

E83-109 Effects of Core Nonuniformities on the Performance of MHD Generators. M. Craig Wynn and R. H. Eustis, *Stanford University* (JE 7, 6, p. 676) Article

E83-110 Optimization of Dish Solar Collectors. Leonard D. Jaffe, *Jet Propulsion Laboratory, California Institute of Technology* (JE 7, 6, p. 604) Article

E83-111 Optimum Propeller Wind Turbines. R. J. Sanderson and R. D. Archer, *University of New South Wales* (JE 7, 6, p. 695) Article

E83-112 Finite Element Analysis of Radiative Transport in Fibrous Insulation. J. A. Roux, H. Y. Yeh, A. M. Smith and S. Y. Wang, *University of Mississippi* (JE 7, 6, p. 702) Article based on AIAA Paper 82-1502

E83-113 Analysis of the Effect of Oxygen Addition on Minimum Ignition Energy. Ju-Shan Chin, *Purdue University* (JE 7, 6, p. 710) Article

E83-114 Oxidant System Improvements for MHD Energy Conversion and Industrial Processes. A. J. Juhasz, *NASA Lewis Research Center* (JE 7, 6, p. 716) Article based on AIAA Paper 83-0468

E83-115 Coal-Fired CAES System Using Fluidized Bed Combustion. S. Moskowitz and R. Schaeffer, *Curtiss-Wright Corporation* (JE 7, 6, p. 724) Article based on AIAA Paper 82-1695 CP826

E83-116 Correlation of Lean Blowoff of Gas Turbine Combustors Using Alternative Fuels. P. A. Leonard and A. M. Mellor, *Purdue University* (JE 7, 6, p. 729) Technical Note

E83-117 Analysis of a Liquid/Gas Direct Contact Heat Exchanger Concept. R. O. Warrington and R. L. Mussulman, *Montana State University* (JE 7, 6, p. 732) Technical Note

E83-118 Power Coefficient of Tornado-Type Wind Turbines. A. A. Rangwalla and C. T. Hsu, *Iowa State University* (JE 7, 6, p. 735) Technical Note

E83-119 An Experimental Model of Bubble Formation in CAES Plants. R. D. Vann and M. D. Feezor, *Duke University Medical Center* (JE 7, 6, p. 737) Technical Note based on AIAA Paper 82-1679 CP826

E83-120 Fault Currents in MHD Faraday Generators. S. Kuo, E. Levi and B. Cheo, *Polytechnic Institute of New York* (JE 7, 6, p. 738) Technical Note

E83-121 The Performance of Biplane Wells Turbine. S. Raghunathan and C. P. Tan, *The Queen's University of Belfast* (JE 7, 6, p. 741) Technical Note

E83-122 Solar Cell Screening Technique. Don A. Gregory and Carol J. Rives, *University of Alabama* (JE 7, 6, p. 743) Technical Note

E83-123 Rated Electrical Power Needed in a Wind Turbine for a Home. Theodore A. Steinberg and Brian W. Reynolds, *New Mexico State University* (JE 7, 6, p. 745) Technical Note

E83-124 Method for Estimating the Aerodynamic Coefficients of Wind Turbine Blades at High Angles of Attack. E. William Beans and Gerald S. Jakubowski, *The University of Toledo* (JE 7, 6, p. 747) Technical Note

E83-125 Theoretical Improvement of Wind Turbine Output by the Addition of Tip Devices. R. M. Sundar and J. P. Sullivan, *Purdue University* (JE 7, 6, p. 749) Technical Note

E83-126 A Simulation Approach in Sizing Hybrid Photovoltaic and Wind Systems. Loren A. Anderson, *University of Central Florida* (JE 7, 6, p. 750) Technical Note
